  - **Details:** Typically involves spraying the yard to reduce mosquito populations.
  - **Seasonal Plan:** \$300 to \$500 for monthly treatments during mosquito season .

## **Additional Services**

- **Ant Treatment:** \$150 to \$300 per treatment.
- **Flea and Tick Control:** \$75 to \$200 per treatment.
- **Cockroach Control:** \$100 to \$400 per treatment, depending on the severity of the infestation .

## **Factors Influencing Pest Control Costs**

1. **Property Size:** Larger properties require more time and materials, increasing costs.
2. **Infestation Severity:** More severe infestations need extensive treatments, which are costlier.
3. **Treatment Frequency:** Regular treatments can be more cost-effective than one-time treatments.
4. **Location:** Prices can vary based on regional pest pressures and cost of living.
5. **Type of Pests:** Specialized treatments for pests like termites and bed bugs are more expensive than general pest control services
